

Instructor Certification Program

Instructors are critical to the educational success of our students. Instructors often possess industry experience, but lack the pedagogical strategies, tactics, and tools to effectively impart their experience and knowledge to students. CVTA values our instructors, which is why we have partnered with Pearson Education to provide our members with 5 levels of self-paced, online Instructor Certification Program (ICP) courses organized to teach and improve vocational instructor ability and performance. Our 5 ICP levels focus on the following major skill areas:

TOPICS INCLUDE, BUT ARE NOT LIMITED TO:

- Classroom Management
- Assessment Strategies
- Instructional Strategies
- Instructional Technology (online and blended)
- Planning and Organization
- Learning Theory
- Emotional Intelligence

Each level contains multiple chapters, each of which contains pop-up quizzes and each end with a comprehensive exam. Once successfully completed, each instructor is awarded a CVTA certificate and patches signifying their level achieved (Basic Instructor, Senior Instructor, etc.). When all levels are completed the Instructor receives a Plaque. We have also added a continuing education component that must be taken every year to maintain the active certification.

CVTA'S UPDATED ICP PROGRAM ENHANCEMENTS INCLUDE:

- Access to training materials and tests through electronic devices such as PCs, laptops, tablets, and smart phones. You may download and print out the materials as well.
- Proven content to make experienced practitioners become effective educators.
- Real-world exercises to help instructors reach and teach students.
